

Mobile Fencing & Security

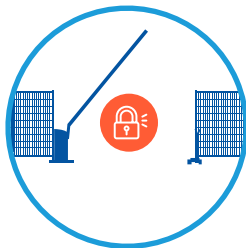

On-site fault finding

At Heras Mobile Fencing & Security, reliable products are always a priority. We are committed to securing your property. Unfortunately, it is impossible to prevent every single failure. However, faults are often simple to fix. This is why we have made a few helpful videos to offer you support. And if the solutions don't work, please contact us. Our service technicians will then arrive on site as soon as possible.

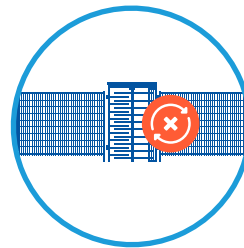

Click on the image to go to the desired fault video.

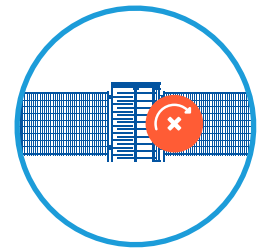

Barrier no longer opens

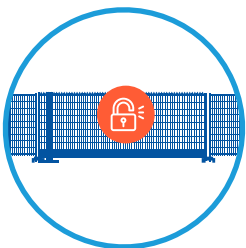

Barrier no longer closes

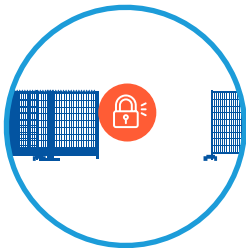

Turnstile is blocked in both directions

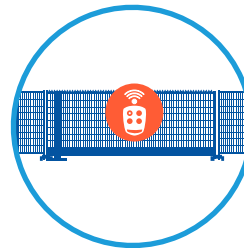

Turnstile turns 1 side free, 1 side blocked
